

REMARKS

The specification has been amended to add the cross-reference to the prior applications.

The above claim amendments present claims patterned after claims of the Bradish 906 patent. The origin of, and support for, the new claims is described in detail below.

A. Background of This Request and Overview

This Preliminary Amendment is being filed with the subject continuation application to present claims patterned after the Bradish, U.S. Patent No. 6,508,906, issued January 21, 2003. More particularly, the above new claims 16-24 have been substantially copied from or are patterned after claims 1, 4-8, 10, 13 and 16, respectively, of the Bradish 906 patent.

These claims are being presented within one year of the January 21, 2003 date on which the Bradish 906 patent was granted, and therefore meet the requirements of 35 U.S.C. 135(b).

Claim 16 is essentially the same as or similar to claim 1 of the Bradish 906 patent. Claim 16, and the other pending claims are fully supported by the specification and are entitled to an effective filing date of at least as early as March 7, 2000 under 35 U.S.C. § 119(a)-(e).

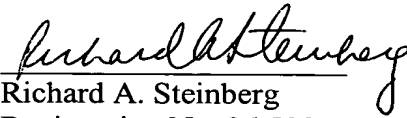

It is respectfully submitted that claims 16-24 are in condition for allowance in this application, and a notice to that effect is courteously solicited.
